

Conversational Informatics

Toyoaki Nishida
Kyoto University

Conversational Informatics is a field of research aiming at investigating human conversational behaviors as well as designing conversational artifacts that can interact with people in a conversational fashion. Based on the foundation of Artificial Intelligence, Pattern Recognition, and Cognitive Science, we attempt to establish a new technology consisting of environmental media, embodied conversational agents, and management of conversational contents. In this talk, I will overview the field of Conversational Informatics and highlight major results.

Conversation is everywhere

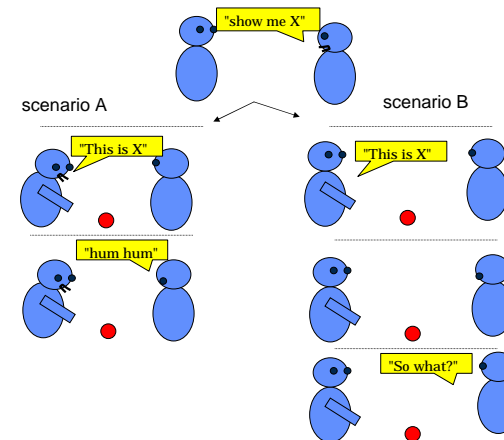

Goal:

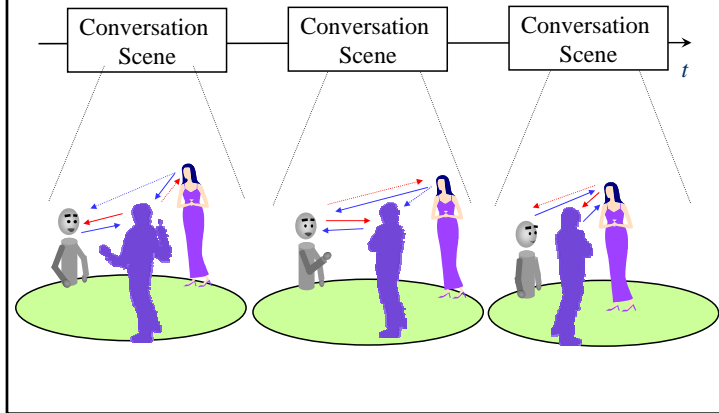

Artifacts that can participate in conversations to help people create knowledge.

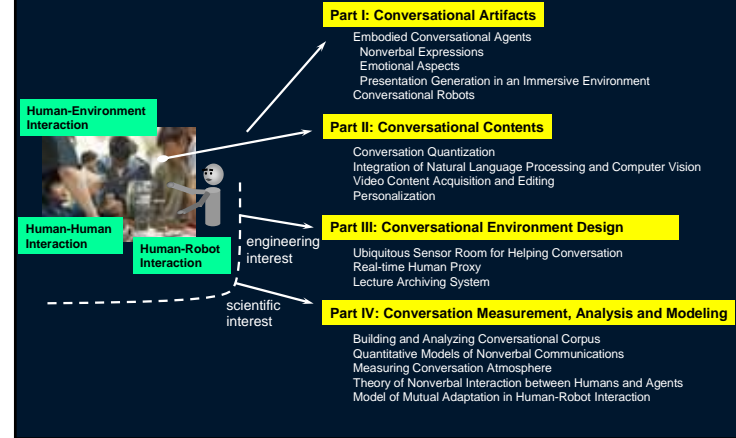

Conversation as interaction

Content-oriented View

Conversational Informatics

Part Conversational Artifacts

— Applying Conversation Quanta

EgoChat

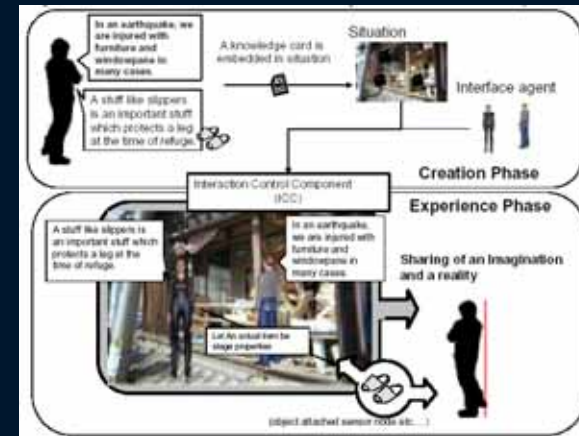

SPOC

IPOC

IPOC -- Immersive Conversation Environment

まとめ

社会問題の発生・沈滞の大きな要因として知識流通の閉塞が考えられる。その解決には、ソフトウェア・エージェント等の導入・支援が考えられるが、人間は言葉の適切さ・不適切さに対して極めて敏感であり、不十分な形式では受け入れられない。本研究はこの問題を自然言語処理技術によって解決する方策を示した。今後の課題としては、本システムをソフトウェア・エージェント等の技術と融合して会話の場を導入する実証的な実験を行い、提案した枠組みの有効性を検証する予定である。

[Kurohashi]

まとめ

- 社会問題の発生・沈滞の大きな原因
 - 知識流通の閉塞が考えられる
 - その解決にはソフトウェア・エージェント等の導入・支援が考えられる
 - 人間は言葉の適切さ・不適切さに対して敏感であり、不十分な形式では受け入れられない
 - 本研究はこの問題を自然言語処理技術によって解決する方策を示した
- 今後の課題
 - 本システムとソフトウェア・エージェント等を融合して会話の場を導入する実証的な実験を行う
 - 提案した枠組みの有効性を検証する予定

The Narration

[Kurohashi]

Conversation content acquisition from closed caption video clips

[Kurohashi]

Part Conversation Environment Design

Acquisition from presentation with a touch panel

The ubiquitous sensor room

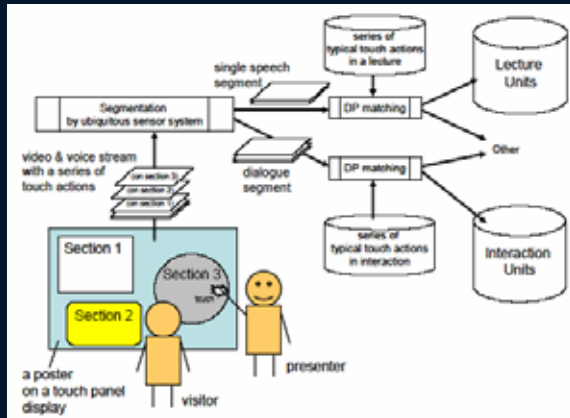

The meeting capture

The virtual classroom on the net

Content Acquisition from Presentation with Touch Panel

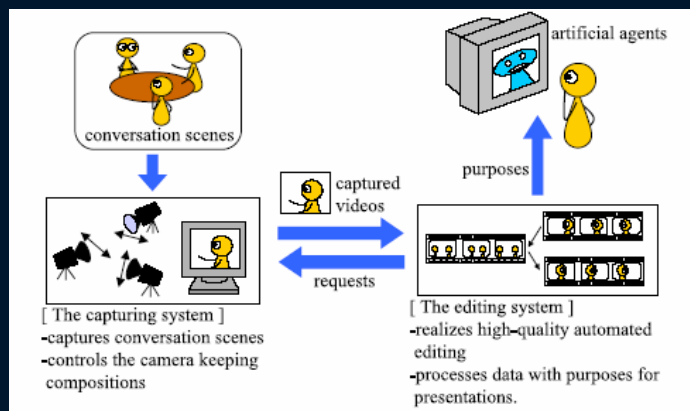

[Kawaguchi, Sumi]

Collaborative capturing of interactions by multiple sensors

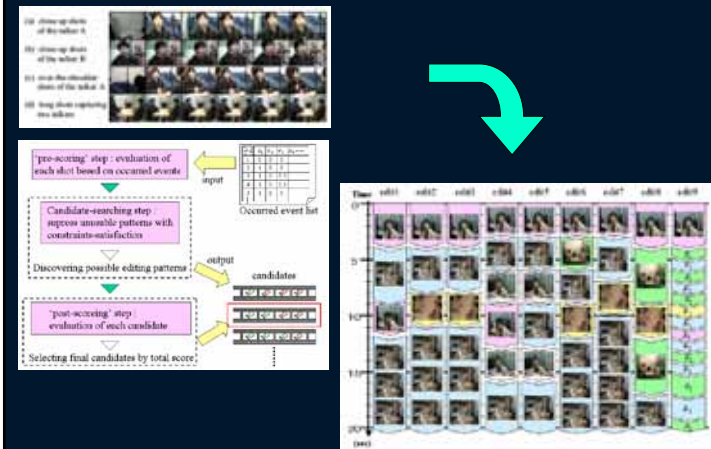

[Sumi]

Video Contents Acquisition and Editing for Conversation Scene

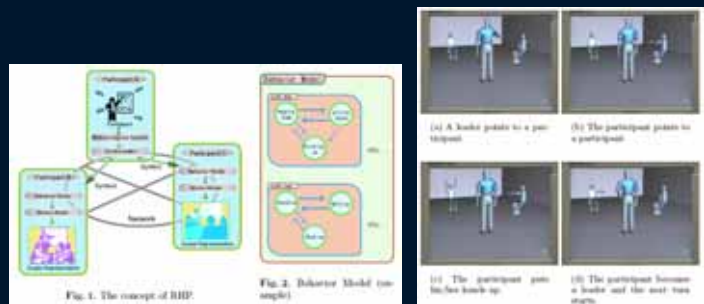

[Nishizaki, Ogata, Nakamura, Ohta 2002]

Smart capture/editing/indexing

[Nishizaki, Ogata, Nakamura, Ohta 2002]

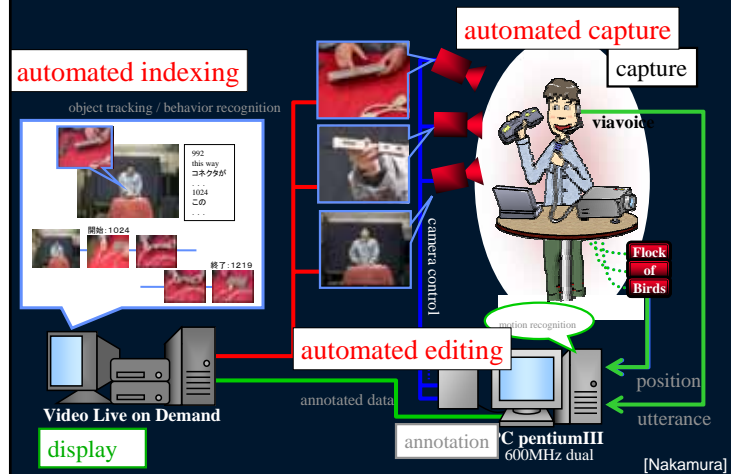

Computer-generated virtual environment

Real Time Human Proxy is an avatar-based interaction system, using real-time vision-based motion sensing, human action symbolization and human action visualization

[Taniguchi, Arita]

smart capture/editing/indexing

smart capture/editing/indexing -- demo

[Nakamura]

Computer-generated virtual environment -- demo

[Taniguchi and Arita]

Part Conversation Measurement and Analysis

Conversation corpus

Mutual adaptation

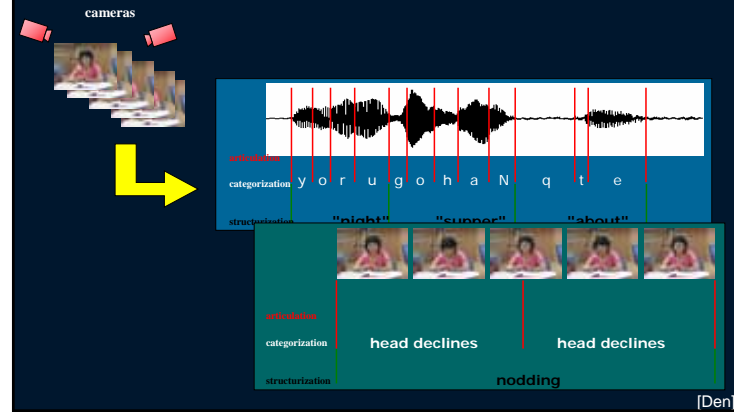

Causal model of conversations

Tagging the conversation

- parallel annotation to verbal and nonverbal information
- articulation, categorization, and structurization

Communication Atmosphere

[Rutkowski 2004]

the scheme

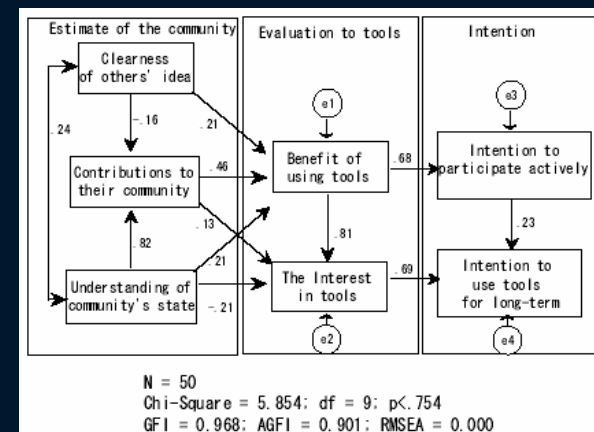

mutual information estimate

communication efficiency

A causal model concerning the intention of participation in a community and using a tool

[Matsumura]

Model of mutual adaptation

[Komatsu et al 2004]

The environment of experimentation

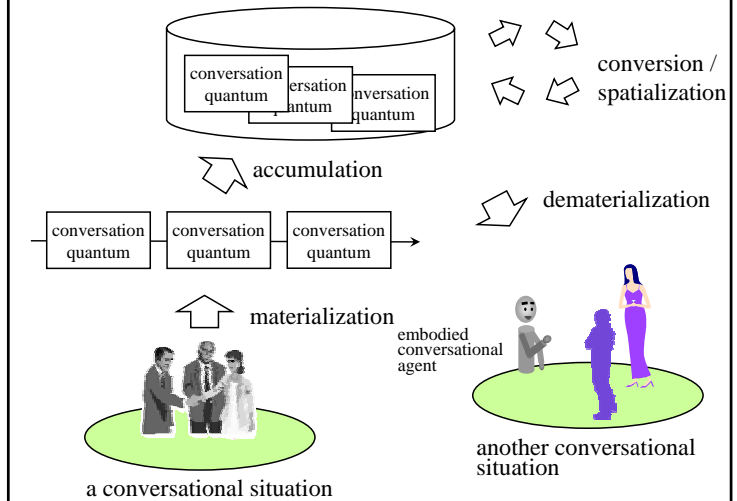

RSA>MWSA: game score increasing

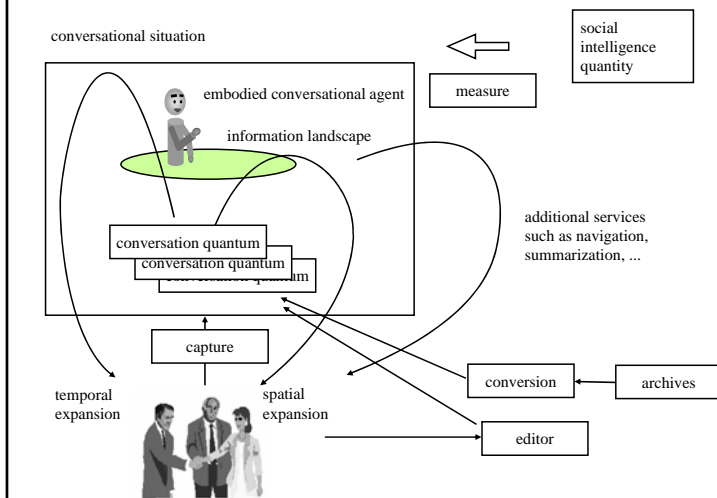

RSA>MWSA: game score decreasing

RSA: Respiratory sinus arrhythmia, MWSA: Mayer wave sinus arrhythmia

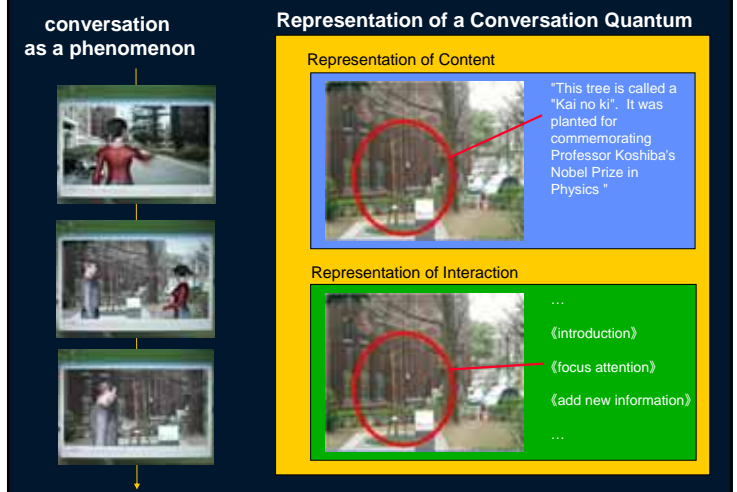

Conversation Quantization

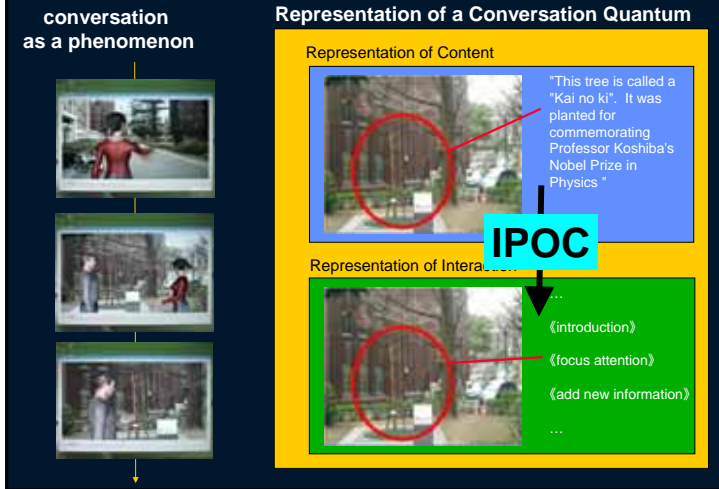

Conversation Quantization (elaborated view)

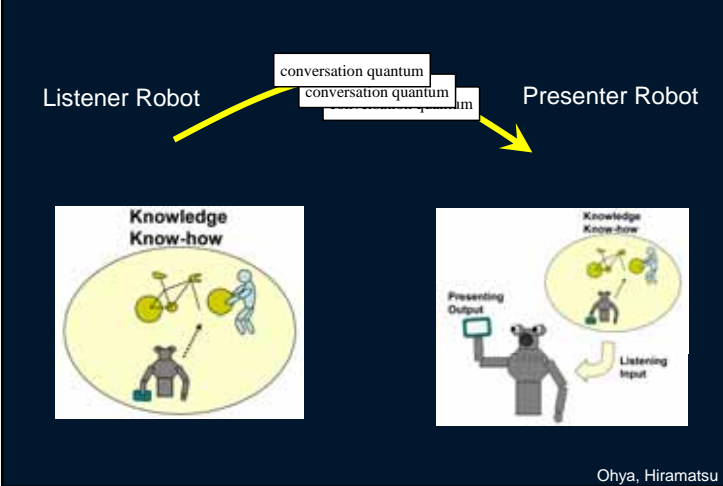

Representing Conversation Quantum

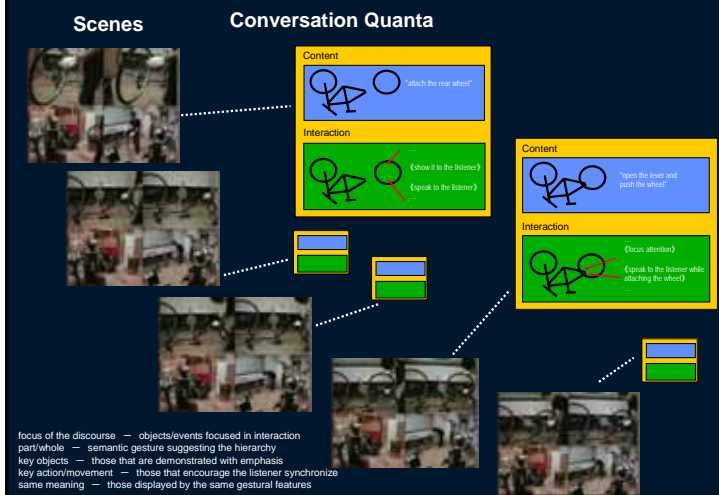

Representing Conversation Quantum

Robot as an embodied knowledge medium

Dynamic binding of Content and Interaction

Difference from previous work

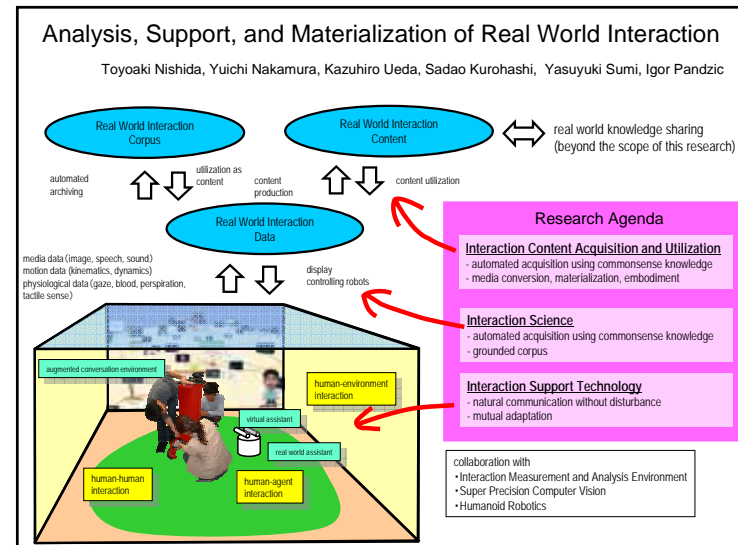

previous work	this work
task-oriented dialogue	conversation as content
dialogue as a means	conversation as the goal
verbal communication	multimodal communication
rule-based methods	data-driven methods

Directions

Intelligence → Communication

Algorithms → Phenomena

Interface → Contents

Summary - Conversational Informatics
